

WANTED: GREEN Entrepreneurs for New Light Electric Vehicle (LEV) Products

Window of opportunity is now open to become **The Source** in your community for new **Light Electric Vehicle (LEV) products - i.e. 2-wheel & 3-wheel electric-motorized low-speed mopeds/scooters, electric bicycles, electric bicycle conversion kits** – in an industry that is already very advanced in Europe & Asia, & is now on the verge of becoming mainstream in the USA.

- Only \$29.95 for 141-page Guide Book written by someone in the industry who was formerly an international management consultant and has already done all the difficult legwork for you. Includes comprehensive details and insights to help you easily set up & manage all aspects of your own LEV Retail Sales, Rental & Repair store, including 140 useful Internet links and sample forms
- Recommended inventory consisting of optimal mix among the highest quality, latest state-of-the-art, affordable LEV products available in the US marketplace today (29 major brands & numerous related accessories) determined from extensive research, established contacts & recent experience
- Enormous potential market - 750% increase in sales in Europe over past 5 years
- Estimated Projections – 10% of all bike sales in USA by 2015: 1.5 million units
- Higher than average Profit Margins as compared to motorcycles or bicycles
- Low investment: minimum of \$10,000 & good credit rating required for start-up
- Advice & instructions provided to help you obtain additional financing if needed

Ideal candidate is an independent, well organized, hands-on self-starter capable of multi-tasking; preferably with experience in retail sales & management; basic computer skills; some technical skills & capabilities would be an asset, but are not essential. You would be conscious & passionate about the urgent need to encourage people to start taking personal action to protect the environment while saving lots of money for themselves by transforming their lifestyles & switching over to using electric-powered transportation that will help create both a healthier and more sustainable Green-based society.

Let me show you how to easily set up & run your own retail store stocked with only the best LEVs on the market with sufficient variety at different price levels to meet the needs & concerns of most consumers. **Experts are predicting that the wave of the future in transportation will be with electric vehicles.** LEVs are set to soon start changing our lifestyles in the 21st century by becoming one of the main alternative modes that people will be using to get around their communities for most of their short distance travel.

If you are interested in participating in this challenging new revolutionary industry & making plenty of money for yourself in the long run while being your own boss, send an email for further information to info@greenriderusa.com

Want to get into the LEV business but **can't afford the minimum investment** listed above? Would you like instead to have the opportunity to start out small from your garage or home? Begin by purchasing only limited quantities of inventory at special highly discounted Small Dealer Prices. Help is available with marketing support too.
